

PCM CLOUD VIDEO

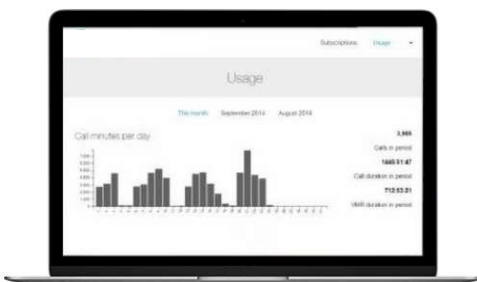

Meet in person from anywhere

PCM Cloud Video is a high-definition business video solution—an all-in-one, affordable and fully supported video conferencing service for every type of organisation, connecting users face to face, wherever they are.

Face-to-face conversation over HD business video is one of the most effective communication tools, you will be able to show, clarify and also build trust with your customers and colleagues. By deploying PCM cloud video solution businesses can provide video experiences that work in conjunction with their secure BYOD (Bring Your Own Device) policy, as HD video is available on a range of devices starting from desktops to mobile devices and conference rooms. Our PCM Cloud Video solutions can be used as virtual meeting rooms for two or more people joining on a video conference as well as for private meeting rooms, where people can call in at any time.

BENEFITS

- ✓ **Increased customer interaction**—through an “in person” experience.
- ✓ **Increased staff productivity and availability** through reduced travel and improved internal collaboration.
- ✓ **Flexibility**— Reach as many people as you require in one video meeting.
- ✓ **Reduced costs**—With an option of performing customer meetings over HD video requirement for domestic and international travel is dramatically reduced.
- ✓ **Variety of uses** from customer meetings, training, staff updates to product launches and more.
- ✓ **Business expansion and growth** —Video is not just a cost effective solution, it has the power to transform and grow the businesses.
- ✓ **Work/ life balance**— Provide your employees with the option of working from home, remotely, or on the move.
