

HYPER CONVERGENCE

Fast to deploy. Simple to manage.
Easy to scale.

CISCO HYPERFLEX SYSTEMS

Cisco HyperFlex™ Systems combine computing, storage, and networking into a simplified, easy-to-use platform. We bring pay-as-you-grow economics of the cloud to on-premises infrastructure so you can gain new levels of agility, efficiency, and adaptability.

THE SOLUTION

Hyperflex platform includes an integrated network fabric, powerful data optimization, and unified management that bring the full potential of hyperconvergence for a wider range of workloads and use cases. Cisco's solution is faster to deploy, simpler to manage, and easier to scale than the current generation of systems. It is ready to provide you with a unified pool of infrastructure resources to power applications as your business needs dictate.

COMPLETE END-TO-END SOLUTION

We offer the first hyperconverged platform that is designed with an end-to-end software-defined infrastructure approach that eliminates the compromises found in first-generation products. We combine software-defined computing in the form of Cisco Unified Computing System™ (Cisco UCS®) servers with Intel® Xeon® processors, software defined storage with powerful new Cisco HyperFlex HX Data Platform™ Software, and software-defined networking with Cisco® unified fabric that will integrate smoothly with Cisco Application Centric Infrastructure (Cisco ACI™). Networking is essential in hyperconverged systems because the storage platform performance, ease of automation, and network security depend on it. The result is a preintegrated cluster with a single management point that is easy to order and can be up and securely running in an hour or less.

WHY PCM?

PCM is the first Cisco Partner in the whole EMEA region to sell the new Hyperflex HX240c to a leading Scotland's legal services company. This project will enable our customer to upgrade and deploy a business critical application and improve business efficiency. Hyperflex solution is also highly scalable which will allow to migrate more business applications to data centre if required. To further future-proof the solution PCM designed Cisco HyperFlex Systems to support a broader range of applications and workloads in the data center, remote locations, and edge – computing environments. Contact PCM to find out how Cisco HyperFlex Systems can enable your digital transformation on 0800-069-8512 or ukinfo@pcm.com.

Agile

Get an end-to-end solution that helps you move faster and achieve your digital transformation.

Efficient

Always keep your data optimized and your infrastructure aligned with application requirements.

Adaptable

Be ready for an expanding range of applications and operating models.
