

SIP TELEPHONY

Value, service and support

SIP TELEPHONY

SIP Circuit with inclusive Free Calls* to UK National and Mobile Numbers. Example cost and saving breakdown for 100 channels with a monthly call costs of £2,000 on their current ISDN solution.

SAVING POTENTIAL

- Monthly—**£2,500**
- In 36 month period—**£90,000**

	SIP	ISDN	Difference
Rental per channel	£7.50	£12.50	-£5
Monthly call costs	0*	£2,000	-£2,000
Total for 1 month	£750	£3,250	-£2,500
total for 36 month	£27,000	£117,000	-£90,000

* Free calls are limited to 5,000 minutes of National Calls and 2,000 minutes of Mobile Calls per month, per channel.

WHY SHOULD YOU CONSIDER SIP TELEPHONY?

- **Significant Cost Saving** - reduction of op-ex costs with reduced channel costs and inclusive* calls (included in 3 year contract)
- **Future Proof Solution** - BT has recently an-nounced that the ISDN service will be switched off in 2025 with no further orders taken and changes made after 2020.
- **Flexibility and Scalability** - ability to increase or decrease the amount of channels as the business requires. This allows to limit the overheads that has to be purchased in an ISDN model.
- **Resilience** - removal of geographical boundaries—numbers can be presented into any circuit at any location
- **Price** - The bottom line is what it often comes down to for businesses, and for the reasons outlined above SIP almost always wins out over ISDN.

WHY PROVISTA?

Managed solution - from the initial consultation to project management, number porting as well as installation and configuration PCM will take care of all of this for you as part of your migration to SIP.

Support - If you have an issue or a query you can contact PCM 24/7 NOC which is manned by Cisco and other major vendor certified engineers.

Service Delivery Management - We'll provide you with quarterly updates and report on the service to make sure you are making the most of your service.
