

CISCO CLOUD COLLABORATION

Be more productive and work
from anywhere.

Cloud Collaboration delivers the latest collaboration functions from the cloud to your business. If you are considering upgrading your legacy solution, we recommend Cloud Collaboration. It will enable your team to collaborate more easily, improve productivity and give your staff an option to work flexibly from a variety of locations and from different devices. Cloud Collaboration will also benefit your IT team by reducing the associated cost and work-load associated with managing an on-premise solution.

BENEFITS

Better Productivity

Enhanced collaboration across
different time zones and
between office and
home workers

Scalability

Pick and choose features required
for users in a particular location or
department

Lower Cost

Be ready for an expanding range
of applications and operating
models

WHY PCM?

At PCM we have vast experience in designing, deploying and managing UC and cloud solutions. We also have advanced Cisco technology qualifications and expertise and can design a collaboration solution that fits your business needs, this could be fully cloud or a Hybrid IT solution that will take into account your current system.
