

HOW CAN THE CLOUD BETTER ENABLE MY BUSINESS?

Enable Agile & Hybrid IT Infrastructure |
PCM Complete Platform & Data Center
Modernization Envisioning Session

Digital transformation is affecting every aspect of the organization, and the cloud is driving innovation and efficiency. It's important for organizations considering new IT projects, hardware refreshes, or existing datacenter modernization to take into consideration where the cloud may be able to augment their efforts. The PCM Complete Platform & Datacenter Modernization Envisioning session is designed to give customers solid footing when examining their existing infrastructure and cloud roadmap.

TOPICS WILL INCLUDE

- ✓ How the cloud is enabling innovation and datacenter digital transformation
- ✓ Understanding the Cloud - IaaS vs PaaS vs SaaS, which is right for you?
- ✓ Common scenarios for the Cloud
 - **Storage, Backup, Disaster Recovery** – Extending and Protecting your data
 - **Hybrid Cloud Enablement** – Taking advantage of cloud capabilities while maintain on premise workloads
- ✓ Datacenter & Application migration to the cloud
 - Migration paths and cost savings

DELIVERABLES

- **Recommendation Document** – Our Recommendation Document will consist of an overview of your environment and objectives, an outline and review of cloud services that will drive business value for your organization, and recommendations for migration and deployment steps for your workloads or applications

HOW CAN PCM HELP?

The success of any organization resides on the ability of their infrastructure to keep up with the growing demands of the business. PCM will work with you to determine what type of infrastructure will best suit your business needs, whether that be in the cloud, hybrid, or within your existing data centers.
