

The Benefits of Electronic Health Records

Deploying an EHR solution throughout your organization can help you streamline processes and stay compliant with regulations.

Over 750,000 physicians in the U.S. play a daily role in caring for the needs of our nation. The recent **American Recovery and Reinvestment Act** is designed as an incentive for the deployment of technology to support the use of an Electronic Health Records (EHR) solution for those providing primary care in a variety of practices.

Proper Health IT Solutions Can:

- Improve the interchange of patient data
- Improve the management of the practice
- Enhance the patient care process.

Benefits of an EHR Solution:

- Workflow efficiencies
- Practice IT upgrades and improvements
- Long-term data retention and management
- Compliance with standards to demonstrate meaningful use and to freely exchange data contributing to the public health record

The HealthDynamix Advantage

Repeatable Solutions

- Incorporates multiple client variations
- Accounts for environmental variables
- Portability and migration ease

Integrated Offerings

- Ancillary solutions that support and integrate with the main solution
- Office-in-a-box capability

Scalable Deployment and Support Capabilities

- Minimize field time
- Prevent rework through quality management
- Site assessment and interactive support

Customer Centric

- Change adoption and training
- Ease of business
- Timely integration and execution

Turnkey Solutions and Full Support Along the Way

HealthDynamix can work directly with you, the physician, or the healthcare system in which you are affiliated to demonstrate our wide range of ambulatory solutions associated with EHR. Our offerings incorporate software, connectivity, data management, training, installation and support.

We will work to ensure that you understand how you can receive government funding for your initiative. HealthDynamix will also explain what impact Electronic Health Records will have on your practice and how you can efficiently and cost-effectively get the technology and training necessary to become more productive with your EHR solution.

Your Account Executive will guide you through the decision-making process and support you at every point in the transition

so you can focus on your mission of providing the very best care possible.

HealthDynamix can help you optimize your care by helping you switch to today's advanced Electronic Health Records solutions.
