

KINGSTON'S SECURE STORAGE

UNDERSTAND THE IMPLICATIONS OF MOBILITY

From income tax records to credit card information and Social Security numbers, sensitive citizen data is crucial to government agency operations. And as the workplace becomes more and more mobile, government agency's employees and contractors they hire are accessing that information everywhere their work takes them.

While mobility helps cultivate a productive and agile organization, agencies face havoc when a laptop or unencrypted flash drive goes missing. Data breaches can expose citizens to identity theft, erode public confidence, disrupt agency operations, trigger increased oversight, and even threaten public safety.

MEET DATA COMPLIANCE RULES HEAD ON

No wonder a growing number of states require government agencies at every level to encrypt and restrict access to the information they keep on millions of citizens. And for agencies that receive funding or share information with the Federal government, even stricter data security requirements often apply.

AVOID THE HIGH COST OF NON-COMPLIANCE

Kingston's encrypted USB drives which include industry favorites from Ironkey, you can simplify compliance by relying on a full range of products that include the right solution to meet every need. Kingston's encrypted line of drives feature products that range from Entry level Alphanumeric keypad PIN protection all the way through FIPS 140-2 Level 3* validated, military-grade encrypted USB storage devices. Kingston lets you put a wall between unauthorized users and the data you need to protect.

Choose from an array of Kingston IronKey and DataTraveler solutions:

- Hardware based encrypted USB flash drives
- FIPS Certification 197 through 140-2 Level 3 (Drive specific)
- Device Management integration seamlessly through DataLocker EMS and SafeConsole products.
