Oracle Linux Support and Oracle VM Support Global Price List

USA (Dollar)
March 1, 2017

Prices in USA (Dollar)

Oracle Linux Support

	License Price	Support Price	Licensing Metric
1 Year Support [1, 2]			
Oracle Linux Network	-	119.00	System
Oracle Linux Basic Limited	-	499.00	System
Oracle Linux Basic	-	1,199.00	System
Oracle Linux Premier Limited	-	1,399.00	System
Oracle Linux Premier	-	2,299.00	System

Prices in USA (Dollar)

Oracle Linux Support

	License Price	Support Price	Licensing Metric
3 Year Support [1, 2]			
Oracle Linux Network	-	357.00	System
Oracle Linux Basic Limited	-	1,497.00	System
Oracle Linux Basic	-	3,597.00	System
Oracle Linux Premier Limited	-	4,197.00	System
Oracle Linux Premier	-	6,897.00	System

Prices in USA (Dollar)

Oracle VM Support

	License Price	Support Price	Licensing Metric
1 Year Support [3]			
Oracle VM Premier Limited	-	599.00	System
Oracle VM Premier	-	1,199.00	System
3 Year Support [3]			
Oracle VM Premier Limited	-	1,797.00	System
Oracle VM Premier	-	3,597.00	System

Prices in USA (Dollar)

Oracle VM VirtualBox Enterprise

	Metric	License Price	Software Update License & Support	Minimum
Oracle VM VirtualBox Enterprise [4]	Named User Plus	50	11.00	100
	Socket	1,000	220.00	1

Footnotes

[1] Oracle Linux support services are provided at the support level and for the term defined in your order. When ordering Oracle Linux support services you must comply with the following availability rules:

- Oracle Linux Premier Limited and Oracle Linux Basic Limited support services are available only for systems with no more than 2 physical CPUs per system. Where computers are clustered, each system within the cluster must have no more than 2 physical CPUs.
- Oracle Linux Premier, Oracle Linux Basic and Oracle Linux Network support services are available for systems with any number of physical CPUs per system.

[2] Extended Support is available for Oracle Linux at the following uplift rates:

Year 11 after product release: 10% of Premier Subscription
Year 12 after product release: 20% of Premier Subscription
Year 13 after product release: 20% of Premier Subscription

[3] Oracle VM support services are provided at the support level and for the term defined in your order. When ordering Oracle VM support services you must comply with the following availability rules:

- Oracle VM Premier Limited support services are available only for systems with no more than 2 physical CPUs per system.
- Oracle VM Premier support services are available for systems with any number of physical CPUs per system

[4] Customers who do not require Software Update License & Support can download and use VirtualBox from http://virtualbox.org at no license charge. If Software Update License & Support later becomes necessary, customer must purchase Oracle VM VirtualBox Enterprise licenses from this price list.

Oracle Linux Definitions

System: is defined as the computer on which the Oracle Linux programs are installed. Where computers/blades are clustered, each computer/blade within the cluster shall be defined as a system.
Physical CPU: is defined as each monolithic integrated circuit responsible for executing a system' programs. A monolithic integrated circuit with multiple cores or hyperthreading is counted as a single physical CPU when determining the total number of physical CPUs in a system.

Oracle VM Definitions

System: is defined as the computer on which the Oracle VM-Server programs are installed. Where computers/blades are clustered, each computer/blade within the cluster shall be defined as a system. For purposes of calculating the price of the Oracle VM support services, the computers where the Oracle VM–Manager programs are installed are not counted.
Physical CPU: is defined as each monolithic integrated circuit responsible for executing a system's programs. ↓ monolithic integrated circuit with multiple cores or hyperthreading is counted as a single physical CPU when determining the total number of physical CPUs in a system.

Oracle VM VirtualBox Enterprise Definitions

Named User Plus is defined as an individual authorized by you to use the programs which are installed on a sing server or multiple servers, regardless of whether the individual is actively using the programs at any given time. A non human operated device will be counted as a named user plus in addition to all individuals authorized to use the programs, if such devices can access the programs. If multiplexing hardware or software (e.g., a TP monitor or a web server product) is used, this number must be measured at the multiplexing front end. Automated batching of data from computer to computer is permitted. You are responsible for ensuring that the named user plus per processor minimums are maintained for the programs contained in the user minimum table in the licensing rules section; the minimums table provides for the minimum number of named users plus required and all actual users must be licensed.
Socket is defined as a slot that houses a chip (or a multi-chip module) which contains a collection of one or more core: Regardless of the number of cores, each chip (or multi-chip module) shall count as a single socket. All occupied sockets on which the Oracle program is installed and/or running must be licensed.

Discount Schedule

The standard Oracle E-Business discount applies to the purchase of Oracle Linux, Oracle VM support services, and Oracle VM VirtualBox Enterprise.

OracleVM Pricing Policies and Practices

Migrating from existing Virtual Iron Support Contracts

Customers wishing to transition from Virtual Iron support to Oracle VM support receive a "duration credit" for the remaining term of their Virtual Iron support contract.
Upon purchase of a new Oracle VM Support Contract ("New Contract"), Oracle will append the time remaining on an active Virtual Iron support contract ("Existing Contract") to the term of the New Contract. The "duration" credit may only be applied to systems currently supported under the Existing Contract. The Virtual Iron support services will be deemed terminated upon execution of this option.
For example:
You have an active Virtual Iron support contract with six months of the term remaining. You purchase a new one year Oracle VM support contract. The term of your New Contract will be eighteen months (twelve months new purchase plus six months duration credit) . The price of your New Contract will be based on the twelve month price for Oracle VM Premier.

Migrating from existing competitive offerings

Migrating from existing competitive offerings. Oracle will offer the follow transition for customer's with existing Linux support offering from a select number of companies. Oracle will provide the following:

For existing Contracts signed before October 25, 2005, Oracle will provide a "duration" credit for the remaining portion of the Customer's current services contract for Red Hat AS, Red Hat ESand Novell SUSE Linux offerings. As a result, the credit may only be applied if the product specific product supported and specific support level under contract meet the following requirements. In the case of Red Hat, the supported product may include any of the following RHEL4 AS or ES, RHEL3 AS or ES, RHEL2.1 AS or ES and must have at least Red Hat's "Standard Edition" service level subscription. For Novell, the "duration" credit may be applied to SUSE Linux Enterprise Server versions 8, 9, or 10 with at least Novell's "Standard Support" service level.

A "duration" credit is applied as follows. For the period of time remaining, Oracle will append their offering to equal the time remaining on your existing contract added to the term of the Oracle contract.

The "duration" credit may only be applied to systems currently supported under the existing Red Hat or Novell agreement. The customer may not apply any Red Hat or Novell entitlement to any system once they receive credit for it from Oracle. Fi example, if a customer has 2 years remaining on servers (A, B, C, D, and E); the credit may not be applied to servers (U, V, W, X and Y).

The Customer's credit can only be applied once.
In order to receive the "duration" credit, the Customer must purchase a subscription with a length that is greater than or equal to the "duration" period remaining on the Red Hat or Novell agreement. For example, if a customer has 2 years remaining on a "standard edition" service agreement covering 24 systems for Red Hat RHEL4 AS, the Customer would minimally need to buy a 3 year subscription from Oracle for either Basic or Premier Support, given that Oracle offers two purchasing options, either a 1 year subscription or 3 year subscription. The duration of the Oracle contract would be 5 years, the price would be based on the 3 year subscription rate for the Basic service. This equates to the 2 years remaining on the Red Hat agreement plus the 3 year subscription from Oracle. If the Customer only elected to purchase a 1 year subscription from Oracle for the Basic subscription, the maximum allowable "duration" credit is 1 year. Therefore, the length for Customer's Oracle contract would be 2 years.
