

PeopleSoft Component Global Price List

Third-Party Products

Oracle products that contain third-party products of some form are indicated as such on the price list and Supplement with an 'X' in the '3rd Party' column on each price list and supplement. These products may have royalty exposure with discounting restrictions or they may have metric restrictions that prevent them from being added to a ULA or unlimited deal, or possibly both. There are two documents that must be accessed for each deal: 1) the Royalty Bearing Product List; 2) the HQApp-ULA list.

Royalty Bearing Product List

First, check the specific royalty exposure on each of these products as provided through the License Royalty Team spreadsheet. Detailed instructions provided below. Go to: "<http://my.oracle.com/site/fin/gfo/GlobalProcesses/InboundLicenseRoyalties/index.htm>". Then on the resulting page, under General Information, click on Royalty Bearing Product List.

Products found to have royalty exposure restrictions must not be discounted below the royalty cost listed in the spreadsheet. There are two tabs on the Royalty Bearing Products list: Royalty Bearing Products and Reporting Only. Search the Royalty Bearing Products tab first then, if needed, search the Reporting Only tab. Here are some tips for using the Royalty sheet.

The Royalty Bearing Products tab is the main tab and lists all products that have specific royalties assigned to them. If you find the desired product in the Product Description column, look over to the License Royalty column for the royalty restrictions. Also be sure to check any comments. The Support Royalty column is not used for quoting purposes and can be ignored.

If a percentage is listed in the License Royalty column (e.g.4%), this means the royalty is calculated based on the Net License Fees (NLF) and there is no deal specific minimum price or discount restriction for this product.

If a specific dollar amount is listed in the License Royalty column (e.g. \$20 per unit), then the product may not be discounted below this value under any circumstances. Please make every effort to keep the final price well above this royalty fee.

There are other types of royalty structures so be sure to read carefully. Some of the entries can be a bit confusing so If there is any question as to deal impact or just to get clarification on any royalty, contact Infoprice@oracle.com or Royalty_US@oracle.com prior to quoting the product.

The Reporting Only tab lists those products where royalties are not paid based on individual deals so there is no individual deal impact. Oracle needs only to track sales of the product for reporting purposes and there are no discounting restrictions with these products.

HQApp-ULA List

Second, go to "<http://my.oracle.com/content/native/cnt507565>" to access the HQApp-ULA spreadsheet.

Products appearing on this spreadsheet can **not** be added to a ULA or Unlimited deal. Note that this sheet does not list royalty impact of any kind. Please see the Royalty Bearing Product list for that information. This spreadsheet only lists those products that have metric restrictions and so selling by any other metric is usually not available. Please make sure to highlight any of these products in your ULA approval.

For Oracle partners, please contact your Oracle PRN Representative for additional information on third-party royalty restrictions.

	12 Named Users	X 92,000	20,240.00	See Supplement	not applicable 8, 33, 35
	25 Named Users	X 138,000	30,360.00	See Supplement	not applicable 8, 33, 35

PeopleSoft Footnotes

- ¹ This product is not available to be sold under Component Pricing.
- ² This product is not available to be sold under Custom Suite Pricing.
- ³ This product is not available to be sold under Enterprise Pricing.
- ⁷ An option must be licensed at the same level (or greater than) as its parent. Example: number of Application Access Controls for PeopleSoft Enterprise users = number of Application Access Controls Governor users. If the parent has multiple metrics, the option must be licensed at the same level as its parent for each metric.
- ⁸ Term licenses are not available for 3rd party resell products.
- ¹⁴ This product is on Controlled Availability and requires approval. Please refer to the Controlled Availability Questions on <http://esource.oraclecorp.com> for more information. If you are an Oracle Partner, please contact your Oracle Representative for additional information.
- ^{14a} The components of Global Payroll for Argentina, Global Payroll for Japan, and Global Payroll for Switzerland of the Payroll product are on Controlled Availability and requires approval. Please refer to the Controlled Availability Questions on <http://esource.oraclecorp.com> for more information. If you are an Oracle Partner, please contact your Oracle Representative for additional information.
- ^{14b} This product is on Controlled Availability in all countries except USA, Canada, Mexico, Australia, New Zealand, United Kingdom, The Netherlands, Belgium, Singapore, Taiwan and Hong Kong. Please refer to the Controlled Availability Questions on <http://esource.oraclecorp.com> for more information. If you are an Oracle Partner, please contact your Oracle Representative for additional information.
- ^{14c} The country-specific derivatives of this product for Argentina and/or Brazil are on Controlled Availability. If the customer is not going to be using these, then CA approval is not required. Please refer to the Controlled Availability Questions on <http://esource.oraclecorp.com> for more information. If you are an Oracle Partner, please contact your Oracle Representative for additional information.
- ^{14d} This product is on Controlled Availability for all industries except for Higher Education. Please refer to the Controlled Availability Questions on <http://esource.oraclecorp.com> for more information. If you are an Oracle Partner, please contact your Oracle Representative for additional information.
- ¹⁵ Where Inventory is licensed across multiple plants or warehouses, the Inventory Option (Mobile Inventory Management) can be licensed individually for each Business Unit/plant/warehouse. Within each Business Unit/plant/warehouse using the Inventory Option, the Option must be licensed equal to or greater than the same user count as Inventory or the actual user count, whichever is greater.
- ¹⁶ If the customer is intending to use release 8.9 of PeopleSoft Supplier Contract Management, please contact Charlotte Jorgenson (charlotte.jorgenson@oracle.com) in the PeopleSoft Product Management team to discuss the Microsoft Word integration with this product. If customer is intending to use release 9.0 or later, there is no need to contact PeopleSoft Product Management.
- ²² When licensing Oracle User Productivity Kit Standard, you must license a minimum of one (1) UPK Developer and either Application Users for UPK Standard or Employees for UPK Standard;
When licensing Oracle User Productivity Kit Professional, you must license a minimum of one (1) UPK Professional Developer and either Application Users for UPK Professional or Employees for UPK Professional;
When licensing any UPK Content Modules, you must license a minimum of: one (1) UPK Developer and either Application Users for UPK Standard or Employees for UPK Standard; OR, one (1) UPK Professional Developer and either Application Users for UPK Professional or Employees for UPK Professional.
- ³³ This product contains third-party functionality and can be licensed only using the standard, assigned price list metric. No enterprise metric or other non-standard metric may be used to license this product. This product must also be sold with a fixed quantity and cannot be sold with an unlimited quantity, as part of a ULA, capped ULA, Pool of Funds (POF) deal, or otherwise. The spreadsheet at <http://my.oracle.com/content/native/cnt507565> contains a complete list of all products that cannot be licensed with non-standard metrics and cannot be sold with unlimited quantities. If you are an Oracle partner, please contact your Oracle PRN Representative for additional information.
- ³⁴ Small businesses (defined as under 250 Million or under 1000 employees) can license 1 Named user. All others must license 2 named users as a minimum.
- ³⁵ Maximum discount on this product is 15%.
- ⁴⁶ For PeopleSoft eSupplier Connection and PeopleSoft Strategic Sourcing, use by your external suppliers is included with your application user licenses.

DEFINITIONS

Application User: is defined as an individual authorized by you to use the applicable licensed application programs which are installed on a single server or multiple servers, regardless of whether the individual is actively using the programs at any given time.

Employee: is defined as (i) all of your full-time, part-time, temporary employees, and (ii) all of your agents, contractors and consultants who have access to, use, or are tracked by the programs. The quantity of the licenses required is determined by the number of Employees and not the actual number of users. In addition, if you elect to outsource any business function(s) to another company, the following must be counted for purposes of determining the number of Employees: all of the company's full-time employees, part-time employees, temporary employees, agents, contractors and consultants that (i) are providing the outsourcing services and (ii) have access to, use, or are tracked by the programs.

Expense Report: is defined as the total number of expense reports by Expenses during a 12 month period. You may not exceed the licensed number of expense reports during any 12 month period.

FTE Student: is defined as any full-time student enrolled in your institution and any part-time student enrolled in your institution counts as 25% of an FTE Student. The definition of "full-time" and "part-time" is based on your policies for student classification. If the number of FTE Students is a fraction, that number will be rounded to the nearest whole number for purposes of license quantity requirements.

Monitored User: is defined as an individual who is monitored by an Analytics program which is installed on a single server or multiple servers, regardless of whether the individual is actively being monitored at any given time.

Individual users who are licensed for an Analytics program by either Named User Plus or Application User may not be licensed by Monitored User.

For the purpose of the Usage Accelerator Analytics program, every user of your licensed CRM Sales application program must be licensed.

For the purpose of the Human Resources Compensation Analytics program, all of your employees must be licensed.

For the purpose of the following Oracle Governance, Risk, and Compliance applications: Advanced Controls for eBusiness Suite, Application Access Controls Governor, Application Access Controls for E-Business Suite, Configuration Controls Governor, Configuration Controls for E-Business Suite, Transaction Controls Governor, and Preventive Controls Governor, the number of Monitored Users is equal to the total number of unique E-Business Suite users (individuals) being monitored by the program(s), as created/defined in the User Administration function of E-Business Suite. Users of iProcurement and/or Self-Service Human Resources are excluded.

For the purpose of the following PeopleSoft Enterprise Governance, Risk, and Compliance applications: Advanced Controls for PeopleSoft Enterprise, Application Access Controls Governor, Application Access Controls for PeopleSoft Enterprise, Configuration Controls Governor, and Configuration Controls for PeopleSoft Enterprise, the number of Monitored Users is equal to the total number of unique PeopleSoft Enterprise (or any other custom applications/programs) users (individuals) that the program monitors.

DEFINITIONS continued

Named User Plus: is defined as an individual authorized by you to use the programs which are installed on a single server or multiple servers, regardless of whether the individual is actively using the programs at any given time. A non human operated device will be counted as a named user plus in addition to all individuals authorized to use the programs, if such devices can access the programs. If multiplexing hardware or software (e.g., a TP monitor or a web server product) is used, this number must be measured at the multiplexing front end. Automated batching of data from computer to computer is permitted. You are responsible for ensuring that the named user plus per processor minimums are maintained for the programs contained in the user minimum table in the licensing rules section; the minimums table provides for the minimum number of named users plus required and all actual users must be licensed.

For the purposes of the following programs: Configuration Management Pack for Applications, System Monitoring Plug-in for Non Oracle Databases, System Monitoring Plug-in for Non Oracle Middleware, Management Pack for Non-Oracle Middleware, Management Pack for WebCenter Suite, only the users of the program that is being managed/monitored are counted for the purpose of determining the number of licenses required.

With respect to the following programs: Load Testing, Load Testing Developer Edition, Load Testing Accelerator for Web Services, Load Testing Accelerator for Oracle Database, and Load Testing Suite for Oracle Applications, each emulated human user and non human operated device shall be considered as a virtual user and shall be counted for the purposes of determining the number of Named User Plus licenses required.

For the purposes of the following programs: Data Masking and Subsetting Pack, and Data Masking and Subsetting Pack for Non-Oracle Databases only the users of the database servers where masked data or data subsets originates and the users of the database servers performing masking, or subsetting operations (via GUI or command line) must be licensed.

For the purposes of the following programs: Application Management Suite for Oracle E-Business Suite, Application Management Suite for PeopleSoft, Application Management Suite for Siebel, Application Management Suite for JD Edwards EnterpriseOne, Real User Experience Insight, Application Replay Pack, all users of the respective managed application program must be counted for the purpose of determining the number of licenses required.

For the purposes of the following program: Oracle GoldenGate and Oracle GoldenGate for Oracle Applications, only (a) the users of the Oracle database from which you capture data and (b) the users of the Oracle database where you will apply the data must be counted for the purpose of determining the number of licenses required.

For the purposes of the following program: Oracle GoldenGate for Non Oracle Database, only (a) the users of the Non Oracle database from which you capture data and (b) the users of the Non Oracle database where you will apply the data must be counted for the purpose of determining the number of licenses required.

For the purposes of the following program: Oracle GoldenGate for Mainframe, only (a) the users of the database from which you capture data and (b) the users of the database where you will apply the data must be counted for the purpose of determining the number of licenses required.

For the purposes of the following program: Oracle GoldenGate for Teradata Replication Services, only (a) the users of the database from which you capture data and (b) the users of the database where you will apply the data must be counted for the purpose of determining the number of licenses required.

For the purposes of the following program: Data Integrator Enterprise Edition, Data Integrator Enterprise Edition for Oracle Applications, and Application Adapters for Data Integrations, the users that are running or accessing the data transformation processes must be counted for the purposes of determining the number of licenses required.

For the purposes of the following programs: Oracle Mobile Suite Client Runtime and Mobile Application Framework, only the end users of each Application Developed must be counted for the purposes of determining the number of licenses required, regardless of the choice of the mobile application development tool or the framework used to build the Application Developed.

Processor: shall be defined as all processors where the Oracle programs are installed and/or running. Programs licensed on a processor basis may be accessed by your internal users (including agents and contractors) and by your third party users. The number of required licenses shall be determined by multiplying the total number of cores of the processor by a core processor licensing factor specified on the Oracle Processor Core Factor Table which can be accessed at <http://oracle.com/contracts>. All cores on all multicore chips for each licensed program are to be aggregated before multiplying by the appropriate core processor licensing factor and all fractions of a number are to be rounded up to the next whole number. When licensing Oracle programs with Standard Edition One, Standard Edition 2, or Standard Edition in the product name (with the exception of Java SE Support, Java SE Advanced, and Java SE Suite), a processor is counted equivalent to an occupied socket; however, in the case of multi-chip modules, each chip in the multi-chip module is counted as one occupied socket.

For example, a multicore chip based server with an Oracle Processor Core Factor of 0.25 installed and/or running the program (other than Standard Edition One programs, Standard Edition 2 programs, or Standard Edition programs) on 6 cores would require 2 processor licenses (6 multiplied by a core processor licensing factor of .25 equals 1.50, which is then rounded up to the next whole number, which is 2). As another example, a multicore server for a hardware platform not specified in the Oracle Processor Core Factor Table installed and/or running the program on 10 cores would require 10 processor licenses (10 multiplied by a core processor licensing factor of 1.0 for 'All other multicore chips' equals 10).

For the purposes of the following program: Healthcare Transaction Base, only the processors on which Internet Application Server Enterprise Edition and Healthcare Transaction Base programs are installed and/or running must be counted for the purpose of determining the number of licenses required.

For the purposes of the following programs: iSupport, iStore and Configurator, only the processors on which Internet Application Server (Standard Edition and/or Enterprise Edition) and the licensed program (e.g., iSupport, iStore and/or Configurator) are running must be counted for the purpose of determining the number of licenses required for the licensed program; under these licenses you may also install and/or run the licensed program on the processors where a licensed Oracle Database (Standard Edition and/or Enterprise Edition) is installed and/or running.

For the purposes of the following programs: Configuration Management Pack for Applications, System Monitoring Plug-in for Non Oracle Databases, System Monitoring Plug-in for Non Oracle Middleware, Management Pack for Non-Oracle Middleware, Management Pack for WebCenter Suite, only the processors on which the program that is being managed/monitored are running are counted for the purpose of determining the number of licenses required.

For the purposes of the following programs: Data Masking and Subsetting Pack and, Data Masking and Subsetting Pack for non-Oracle Databases all database servers where masked data or data subsets originate and database servers performing masking, or subsetting operations (via GUI or command line) must be licensed.

For the purposes of the following programs: Application Management Suite for Oracle E-Business Suite, Application Management Suite for PeopleSoft, Application Management Suite for Siebel, Application Management Suite for JD Edwards EnterpriseOne, all processors on which the middleware and/or database software that support the respective managed application program are running must be counted for the purpose of determining the number of licenses required.

For the purposes of the following programs: Application Replay Pack, Real User Experience Insight, all processors on which the middleware software that support the respective managed application program are running must be counted for the purpose of determining the number of licenses required.

For the purposes of the following programs: Informatica PowerCenter and PowerConnect Adapters, and Application Adapter for Warehouse Builder for: PeopleSoft, Oracle E-Business Suite, Siebel, and SAP, only the processor(s) on which the target database is running must be counted for the purpose of determining the number of licenses required.

For the purposes of the following programs: Data Integrator Enterprise Edition, Data Integrator Enterprise Edition for Oracle Applications, Data Integrator for Oracle Business Intelligence, and Application Adapters for Data Integration, only the processor(s) where the data transformation processes are executed must be counted for the purposes of determining the number of licenses required.

For the purposes of the following program: TimesTen Application-Tier Database Cache, and TimesTen Application-Tier Database Cache for Oracle Applications, only the processors on which the Times Ten In-Memory Database component of the In-Memory Database Cache program is installed and/or running must be counted for the purpose of determining the number of licenses required.

For the purposes of the following program: Oracle GoldenGate and Oracle GoldenGate for Oracle Applications, only (a) the processors running the Oracle database from which you capture data and (b) the processors running the Oracle database where you will apply the data must be counted for the purpose of determining the number of licenses required.

For the purposes of the following program: Oracle GoldenGate for Non Oracle Database, only (a) the processors running the Non Oracle database from which you capture data and (b) the processors running the Non Oracle database where you will apply the data must be counted for the purpose of determining the number of licenses required.

For the purposes of the following program: Oracle GoldenGate for Mainframe, only (a) the processors running the database from which you capture data and (b) the processors running the database where you will apply the data must be counted for the purpose of determining the number of licenses required.

For the purposes of the following program: Oracle GoldenGate for Teradata Replication Services, only (a) the processors running the database from which you capture data and (b) the processors running the database where you will apply the data must be counted for the purpose of determining the number of licenses required.

For the purpose of the following programs: Oracle Golden Gate Application Adapters, only the processors running the source Oracle or non Oracle database(s) from which you capture data must be counted for the purpose of determining the number of licenses required. In the instance of multiple source databases, all processors for all sources must be counted.

For the purposes of the following program: Audit Vault and Database Firewall, only the processors of the sources which are protected, monitored or audited must be counted for the purpose of determining the number of licenses required.

DEFINITIONS continued

UPK Developer: is defined as an individual authorized by you to use the programs which are installed on a single server or multiple servers, regardless of whether the individual is actively using the programs at any given time. UPK Developers may create, modify, view and interact with simulations and documentation.

UPK Module: is defined as the functional software component described in the product documentation.

For a complete list of products offered by Oracle Corporation, please visit the Oracle Software Delivery cloud site:

<http://edelivery.oracle.com>

GENERAL LICENSING RULES

TERM DESIGNATION

Term licensing available for all PeopleSoft products. The list price for a term license is based on a specific percentage of the perpetual license price. Annual terms licenses are available from 1 to 5 years:

1 year - 20% of list; 2 year - 35% of list, 3 year - 50% of list, 4 year 60% of list and 5 year 70% of list.

The term license percentages are not applied to the list support price. E-Business discount, and any approved discount, is applied to the list support price.

Example :

For a perpetual license for 10 Application Users of PeopleSoft Financials, the list license price is \$45,950 and the list annual support price is \$10,109.

For a one year term license of PeopleSoft Financials, the list license price is 20% of \$45,950 = \$9,190. The list annual support price remains \$10,109, and is not affected by the 20% term multiplier.

If this was part of a larger contract which qualified for a 10% E-Business discount, the one year term net license price would be \$8,271 and the net annual support price would be \$9,098.10.

If your Program License does not specify a term, the Program license is perpetual and shall continue unless terminated as otherwise provided in the Agreement.

5 Year Term: A Program license specifying a 5 Year Term shall commence on the Effective Date of the order and shall continue for a period of 5 years. At the end of the 5 Year Term the Program license shall terminate automatically.

4 Year Term: A Program license specifying a 4 Year Term shall commence on the Effective Date of the order and shall continue for a period of 4 years. At the end of the 4 Year Term the Program license shall terminate automatically.

3 Year Term: A Program license specifying a 3 Year Term shall commence on the Effective Date of the order and shall continue for a period of 3 years. At the end of the 3 Year Term the Program license shall terminate automatically.

2 Year Term: A Program license specifying a 2 Year Term shall commence on the Effective Date of the order and shall continue for a period of 2 years. At the end of the 2 Year Term the Program license shall terminate automatically.

1 Year Term: A Program license specifying a 1 Year Term shall commence on the Effective Date of the order and shall continue for a period of 1 year. At the end of the 1 Year Term the Program license shall terminate automatically.

ORACLE SUPPORT SERVICES

Oracle Support Services (OSS) offers the following programs: Software Update License & Support to provide customers with the right to Oracle product upgrades and 24x7 support of all Oracle products, and Oracle Advanced Customer Support for a menu of additional services designed to provide an enhanced level of support. Services may vary by country. For availability, contact your local Support Sales representative. For a complete description of Oracle Support Services programs, refer to the Sales Support website at <http://www.oracle.com/Support>

Software Update License & Support

Software Updates License & Support provides customers with the right to product upgrades and 24x7 technical support, and is available for five years from the release date of the product. Product upgrades includes upgraded versions of software, maintenance releases and patches. Customers receive direct access Oracle experts for product-specific questions about installing and operating Oracle software. Web based support is provided via OracleMetaLink. Features of MetaLink include proactive notifications, customized home pages, technical libraries and forums, product life-cycle information, a bug database, and the ability to log technical assistance requests.

Support Renewals

Prices shown on this price list are annual fees that apply to both perpetual and term licenses for first year support only. The price of a technical support renewal for Software Update License & Support is the technical support fees paid for the same licenses in the prior year, increased by the Inflationary Adjustment Rate (IAR). For licenses with an active Contractual Cap Rate (CCR), support is increased by the lower of the CCR or the IAR. In all cases, any valid technical support cap included in a license agreement or ordering document that governs the licenses, limits the renewal adjustment. For more information on renewal adjustments, contact your Support Sales representative.

Advanced Customer Support

Advanced Customer Support is designed to provide an enhanced level of support to Oracle customers. Advanced Customer Support delivers tailored, flexible support solutions built to meet the customers' specific business requirements. Advanced Customer Support customers have the flexibility to purchase standard or combine standard services with specific offerings to provide a full solution.

Contact your local Support Sales representative for Advanced Customer Support information and pricing.

Incident Server Support Packages

Incident Server Support Packages provide incident-based web support for the following limited product sets:

- Oracle Database Server Support Package (2,300 USA (Dollar) for 10 incidents on one server):
Oracle Database Enterprise Edition, Oracle Database Standard Edition 2, Partitioning, Real Application Clusters, Advanced Compression
- Oracle Application Server Support Package (1,150 USA (Dollar) for 10 incidents on one server):
Internet Application Server Enterprise Edition, Internet Application Server Standard Edition, Internet Application Server Java Edition

With the purchase of Incident Server Support Packages, customers receive access to Oracle *MetaLink*, which provides 24x7 web-based technical support, including web-based Technical Assistance Requests.

Customer Support Services Policies and Definitions

The complete policy can be found in the Technical Support Policies at <http://www.oracle.com/support>

Extended Support

Customers with current Software Updates, License & Support can support their product for a further 3 years, past the initial 5 years from the general availability date of the product, by purchasing Extended Support. Extended Support fees are applied to the desupported Oracle programs only. Extended Support fees consist of the prior year's fee for Software Updates & Support plus the applicable renewal adjustment, plus an additional fee based on the year. Additional fees are as follows:

Year 6 after product release: 10% of current year's Software Update License & Support
Year 7 after product release: 20% of current year's Software Update License & Support
Year 8 after product release: 20% of current year's Software Update License & Support

Extended Support offers the following:

- Updates, fixes and security alerts
- Tax, legal and regulatory updates
- Upgrade scripts
- Technical support
- Major product and technology releases

Sustaining Support

Sustaining Support offered in years 9 and beyond provides technical support—i.e., access to Oracle's online and call-center support—and rights to future products for as long the customer is purchasing support. Sustaining support is charged as per renewal pricing, found in the "Support Renewals" section above.

Sustaining Support provides:

- Technical Support
- Access to MetaLink/Customer Connection
- Major product and technology releases
- Pre-existing fixes

ORACLE ON DEMAND

Oracle offers complete application, database, and hardware management services, which can help lower a customer's IT maintenance costs and increase support resolution time.

Administration Services

Administration Services are system administration, application technology management and monitoring activities provided remotely by Oracle for licensed Oracle programs. Administration Services are contracted on yearly terms; the billing is annual in advance.

Computer and Administration Services

Computer Services must be sold together with Administration Services. Computer and Administration Services are system administration, application technology management, and monitoring activities for licensed Oracle programs that are provided by Oracle from a data center hosting facility to which the customer has remote applications access. Computer and Administration Services are contracted on yearly terms; the billing is annual in advance.

PeopleSoft Custom Application Suite Global Price List
May 31, 2016

PeopleSoft Custom Application Suite Global Price List

Third-Party Products

Oracle products that contain third-party products of some form are indicated as such on the price list and Supplement with an 'X' in the '3rd Party' column on each price list and supplement. These products may have royalty exposure with discounting restrictions or they may have metric restrictions that prevent them from being added to a ULA or unlimited deal, or possibly both. There are two documents that must be accessed for each deal: 1) the Royalty Bearing Product List; 2) the HQApp-ULA list.

Royalty Bearing Product List

First, check the specific royalty exposure on each of these products as provided through the License Royalty Team spreadsheet. Detailed instructions provided below.

Go to: "<http://my.oracle.com/site/fin/gfo/GlobalProcesses/InboundLicenseRoyalties/index.htm>". Then on the resulting page, under General Information, click on Royalty Bearing Product List.

Products found to have royalty exposure restrictions must not be discounted below the royalty cost listed in the spreadsheet. There are two tabs on the Royalty Bearing Products list: Royalty Bearing Products and Reporting Only. Search the Royalty Bearing Products tab first then, if needed, search the Reporting Only tab. Here are some tips for using the Royalty sheet.

The Royalty Bearing Products tab is the main tab and lists all products that have specific royalties assigned to them. If you find the desired product in the Product Description column, look over to the License Royalty column for the royalty restrictions. Also be sure to check any comments. The Support Royalty column is not used for quoting purposes and can be ignored.

If a percentage is listed in the License Royalty column (e.g.4%), this means the royalty is calculated based on the Net License Fees (NLF) and there is no deal specific minimum price or discount restriction for this product.

If a specific dollar amount is listed in the License Royalty column (e.g. \$20 per unit), then the product may not be discounted below this value under any circumstances. Please make every effort to keep the final price well above this royalty fee.

There are other types of royalty structures so be sure to read carefully. Some of the entries can be a bit confusing so If there is any question as to deal impact or just to get clarification on any royalty, contact Infoprice@oracle.com or Royalty_US@oracle.com prior to quoting the product.

The Reporting Only tab lists those products where royalties are not paid based on individual deals so there is no individual deal impact. Oracle needs only to track sales of the product for reporting purposes and there are no discounting restrictions with these products.

HQApp-ULA List

Second, go to "<http://my.oracle.com/content/native/cnt507565>" to access the HQApp-ULA spreadsheet.

Products appearing on this spreadsheet can **not** be added to a ULA or Unlimited deal. Note that this sheet does not list royalty impact of any kind. Please see the Royalty Bearing Product list for that information. This spreadsheet only lists those products that have metric restrictions and so selling by any other metric is usually not available. Please make sure to highlight any of these products in your ULA approval.

For Oracle partners, please contact your Oracle PRN Representative for additional information on third-party royalty restrictions.

- ² This product is not available to be sold under Custom Suite Pricing.
- ³ This product is not available to be sold under Enterprise Pricing.
- ¹⁴ This product is on Controlled Availability and requires approval. Please refer to the Controlled Availability Questions on <http://esource.oraclecorp.com> for more information. If you are an Oracle Partner, please contact your Oracle Representative for additional information.
- ^{14c} The country-specific derivatives of this product for Argentina and/or Brazil are on Controlled Availability. If the customer is not going to be using these, then CA approval is not required. Please refer to the Controlled Availability Questions on <http://esource.oraclecorp.com> for more information. If you are an Oracle Partner, please contact your Oracle Representative for additional information.
- ¹⁵ Where Inventory is licensed across multiple plants or warehouses, the Inventory Option (Mobile Inventory Management) can be licensed individually for each Business Unit/plant/warehouse. Within each Business Unit/plant/warehouse using the Inventory Option, the Option must be licensed equal to or greater than the same user count as Inventory or the actual user count, whichever is greater.
- ¹⁶ If the customer is intending to use release 8.9 of PeopleSoft Supplier Contract Management, please contact Charlotte Jorgenson (charlotte.jorgenson@oracle.com) in the PeopleSoft Product Management team to discuss the Microsoft Word integration with this product. If customer is intending to use release 9.0 or later, there is no need to contact PeopleSoft Product Management.
- ⁴⁶ For PeopleSoft eSupplier Connection and PeopleSoft Strategic Sourcing, use by your external suppliers is included with your application user licenses.

DEFINITIONS

Custom Suite User: is defined as an individual authorized by you to use the application programs included in the applicable Custom Applications Suite, which are installed on a single server or multiple servers, regardless of whether or not the individual is actively using the programs at any given time.

For a complete list of products offered by Oracle Corporation, please visit the Oracle Software Delivery cloud site:
<http://edelivery.oracle.com>

GENERAL LICENSING RULES

TERM DESIGNATION

Term licensing available for all PeopleSoft products. The list price for a term license is based on a specific percentage of the perpetual license price. Annual terms licenses are available from 1 to 5 years:

1 year - 20% of list; 2 year - 35% of list; 3 year - 50% of list; 4 year 60% of list and 5 year 70% of list.

The term license percentages are not applied to the list support price. E-Business discount, and any approved discount, is applied to the list support price.

Example :

For a perpetual license for 10 Application Users of PeopleSoft Financials, the list license price is \$45,950 and the list annual support price is \$10,109.

For a one year term license of PeopleSoft Financials, the list license price is 20% of \$45,950 = \$9,190. The list annual support price remains \$10,109, and is not affected by the 20% term multiplier.

If this was part of a larger contract which qualified for a 10% E-Business discount, the one year term net license price would be \$8,271 and the net annual support price would be \$9,098.10.

If your Program License does not specify a term, the Program license is perpetual and shall continue unless terminated as otherwise provided in the Agreement.

5 Year Term: A Program license specifying a 5 Year Term shall commence on the Effective Date of the order and shall continue for a period of 5 years. At the end of the 5 Year Term the Program license shall terminate automatically.

4 Year Term: A Program license specifying a 4 Year Term shall commence on the Effective Date of the order and shall continue for a period of 4 years. At the end of the 4 Year Term the Program license shall terminate automatically.

3 Year Term: A Program license specifying a 3 Year Term shall commence on the Effective Date of the order and shall continue for a period of 3 years. At the end of the 3 Year Term the Program license shall terminate automatically.

2 Year Term: A Program license specifying a 2 Year Term shall commence on the Effective Date of the order and shall continue for a period of 2 years. At the end of the 2 Year Term the Program license shall terminate automatically.

1 Year Term: A Program license specifying a 1 Year Term shall commence on the Effective Date of the order and shall continue for a period of 1 year. At the end of the 1 Year Term the Program license shall terminate automatically.

ORACLE SUPPORT SERVICES

Oracle Support Services (OSS) offers the following programs: Software Update License & Support to provide customers with the right to Oracle product upgrades and 24x7 support of all Oracle products, and Oracle Advanced Customer Support for a menu of additional services designed to provide an enhanced level of support. Services may vary by country. For availability, contact your local Support Sales representative. For a complete description of Oracle Support Services programs, refer to the Sales Support website at <http://www.oracle.com/Support>

Software Update License & Support

Software Updates License & Support provides customers with the right to product upgrades and 24x7 technical support, and is available for five years from the release date of the product. Product upgrades includes upgraded versions of software, maintenance releases and patches. Customers receive direct access Oracle experts for product-specific questions about installing and operating Oracle software. Web based support is provided via OracleMetaLink. Features of MetaLink include proactive notifications, customized home pages, technical libraries and forums, product life-cycle information, a bug database, and the ability to log technical assistance requests.

Support Renewals

Prices shown on this price list are annual fees that apply to both perpetual and term licenses for first year support only. The price of a technical support renewal for Software Update License & Support is the technical support fees paid for the same licenses in the prior year, increased by the Inflationary Adjustment Rate (IAR). For licenses with an active Contractual Cap Rate (CCR), support is increased by the lower of the CCR or the IAR. In all cases, any valid technical support cap included in a license agreement or ordering document that governs the licenses, limits the renewal adjustment. For more information on renewal adjustments, contact your Support Sales representative.

Advanced Customer Support

Advanced Customer Support is designed to provide an enhanced level of support to Oracle customers. Advanced Customer Support delivers tailored, flexible support solutions built to meet the customers' specific business requirements. Advanced Customer Support
Contact your local Support Sales representative for Advanced Customer Support information and pricing.

Incident Server Support Packages

Incident Server Support Packages provide incident-based web support for the following limited product sets:

- Oracle Database Server Support Package (2,300 USA (Dollar) for 10 incidents on one server):
Oracle Database Enterprise Edition, Oracle Database Standard Edition 2, Partitioning, Real Application Clusters, Advanced Compression
- Oracle Application Server Support Package (1,150 USA (Dollar) for 10 incidents on one server):
Internet Application Server Enterprise Edition, Internet Application Server Standard Edition, Internet Application Server Java Edition

With the purchase of Incident Server Support Packages, customers receive access to Oracle *MetaLink*, which provides 24x7 web-based technical support, including web-based Technical Assistance Requests.

Customer Support Services Policies and Definitions

The complete policy can be found in the Technical Support Policies at <http://www.oracle.com/support>

Extended Support

Customers with current Software Updates, License & Support can support their product for a further 3 years, past the initial 5 years from the general availability date of the product, by purchasing Extended Support. Extended Support fees are applied to the desupported Oracle programs only. Extended Support fees consist of the prior year's fee for Software Updates & Support plus the applicable renewal adjustment, plus an additional fee based on the year. Additional fees are as follows:

Year 6 after product release: 10% of current year's Software Update License & Support
Year 7 after product release: 20% of current year's Software Update License & Support
Year 8 after product release: 20% of current year's Software Update License & Support

Extended Support offers the following:

- Updates, fixes and security alerts
- Tax, legal and regulatory updates
- Upgrade scripts
- Technical support
- Major product and technology releases

Sustaining Support

Sustaining Support offered in years 9 and beyond provides technical support—i.e., access to Oracle's online and call-center support—and rights to future products for as long the customer is purchasing support. Sustaining support is charged as per renewal pricing, found in the "Support Renewals" section above.

Sustaining Support provides:

- Technical Support
- Access to MetaLink/Customer Connection
- Major product and technology releases
- Pre-existing fixes

ORACLE ON DEMAND

Oracle offers complete application, database, and hardware management services, which can help lower a customer's IT maintenance costs and increase support resolution time.

Administration Services are system administration, application technology management and monitoring activities provided remotely by Oracle for licensed Oracle programs. Administration Services are contracted on yearly terms; the billing is annual in advance.

Computer and Administration Services

Computer Services must be sold together with Administration Services. Computer and Administration Services are system administration, application technology management, and monitoring activities for licensed Oracle programs that are provided by Oracle from a data center hosting facility to which the customer has remote applications access. Computer and Administration Services are contracted on yearly terms; the billing is annual in advance.

PeopleSoft Enterprise Global Price List
May 31, 2016

PeopleSoft Enterprise Global Price List

Third-Party Products

Oracle products that contain third-party products of some form are indicated as such on the price list and Supplement with an 'X' in the '3rd Party' column on each price list and supplement. These products may have royalty exposure with discounting restrictions or they may have metric restrictions that prevent them from being added to a ULA or unlimited deal, or possibly both. There are two documents that must be accessed for each deal: 1) the Royalty Bearing Product List; 2) the HQApp-ULA list.

Royalty Bearing Product List

First, check the specific royalty exposure on each of these products as provided through the License Royalty Team spreadsheet. Detailed instructions provided below.

Go to: "<http://my.oracle.com/site/fin/gfo/GlobalProcesses/InboundLicenseRoyalties/index.htm>". Then on the resulting page, under General Information, click on Royalty Bearing Product List.

Products found to have royalty exposure restrictions must not be discounted below the royalty cost listed in the spreadsheet. There are two tabs on the Royalty Bearing Products list: Royalty Bearing Products and Reporting Only. Search the Royalty Bearing Products tab first then, if needed, search the Reporting Only tab. Here are some tips for using the Royalty sheet.

The Royalty Bearing Products tab is the main tab and lists all products that have specific royalties assigned to them. If you find the desired product in the Product Description column, look over to the License Royalty column for the royalty restrictions. Also be sure to check any comments. The Support Royalty column is not used for quoting purposes and can be ignored.

If a percentage is listed in the License Royalty column (e.g.4%), this means the royalty is calculated based on the Net License Fees (NLF) and there is no deal specific minimum price or discount restriction for this product.

If a specific dollar amount is listed in the License Royalty column (e.g. \$20 per unit), then the product may not be discounted below this value under any circumstances. Please make every effort to keep the final price well above this royalty fee.

There are other types of royalty structures so be sure to read carefully. Some of the entries can be a bit confusing so If there is any question as to deal impact or just to get clarification on any royalty, contact Infoprice@oracle.com or Royalty_US@oracle.com prior to quoting the product.

The Reporting Only tab lists those products where royalties are not paid based on individual deals so there is no individual deal impact. Oracle needs only to track sales of the product for reporting purposes and there are no discounting restrictions with these products.

HQApp-ULA List

Second, go to "<http://my.oracle.com/content/native/cnt507565>" to access the HQApp-ULA spreadsheet.

Products appearing on this spreadsheet can not be added to a ULA or Unlimited deal. Note that this sheet does not list royalty impact of any kind. Please see the Royalty Bearing Product list for that information. This spreadsheet only lists those products that have metric restrictions and so selling by any other metric is usually not available. Please make sure to highlight any of these products in your ULA approval.

For Oracle partners, please contact your Oracle PRN Representative for additional information on third-party royalty restrictions.

DEFINITIONS

Enterprise Employee: is defined as (i) all of your full-time, part-time, temporary employees, and (ii) all of your agents, contractors and consultants who have access to, use, or are tracked by the programs. The quantity of the licenses required is determined by the number of Enterprise Employees and not the actual number of users. In addition, if you elect to outsource any business function(s) to another company, the following must be counted for the purposes of determining the number of Enterprise Employees: all of the company's full-time employees, part-time employees, temporary employees, agents, contractors and consultants that (i) are providing the outsourcing services and (ii) have access to, use, or are tracked by the programs. The value of these program licenses is determined by the number of Enterprise Employees. For these program licenses, the licensed quantity purchased must, at a minimum be equal to the number of Enterprise Employees as of the effective date of your order. If at any time the number of Enterprise Employees exceeds the licensed quantity, you are required to order additional licenses (and technical support for such additional licenses) such that the number of Enterprise Employees is equal to or less than the number of licensed quantity. You are not entitled to any refund, credit or other consideration of any kind if there is a reduction in the number of Enterprise Employees. In addition, each year 90 days before the anniversary date of your order, you are required to report to Oracle the number of Enterprise Employees as of such date.

The minimum is 400 or all employees - whichever is larger.

Enterprise \$M in Revenue: is defined as one million U.S. dollars in all income (interest income and non interest income) before adjustments for expenses and taxes generated by you during a fiscal year. The value of these program licenses is determined by the amount of Enterprise \$M in Revenue. For these program licenses, the licensed quantity purchased must, at a minimum be equal to the amount of Enterprise \$M in Revenue as of the effective date of your order. If at any time the amount of Enterprise \$M in Revenue exceeds the license quantity, you are required to order additional licenses (and technical support for such additional licenses) such that the amount of Enterprise \$M in Revenue equal to or less than the number of licensed quantity. You are not entitled to any refund, credit or other consideration of any kind if there is a reduction in the amount of Enterprise \$M in Revenue. In addition, each year 90 days before the anniversary date of your order, you are required to report to Oracle the number of Enterprise \$M in Revenue as of such date.

Enterprise FTE Student: is defined as any full-time student enrolled in your institution and any part-time student enrolled in your institution counts as 25% of an FTE Student. The definition of "full-time" and "part-time" is based on your policies for student classification. If the number of FTE Students is a fraction, that number will be rounded to the nearest whole number for purposes of license quantity requirements. The value of these program licenses is determined by the number of Enterprise FTE Students. For these program licenses, the licensed quantity purchased must, at a minimum, be equal to the number of Enterprise FTE Students as of the effective date of your order. If at any time the number of Enterprise FTE Students exceeds the licensed quantity, you are required to order additional licenses (and technical support for such additional licenses) such that the number of Enterprise FTE Students is equal to or less than the licensed quantity. You are not entitled to any refund, credit or other consideration of any kind if there is a reduction in the number of Enterprise FTE Students. In addition, each year 90 days before the anniversary date of your order, you are required to report to Oracle the number of Enterprise FTE Students as of such date.

<http://edelivery.oracle.com>

GENERAL LICENSING RULES

TERM DESIGNATION

Term licensing available for all PeopleSoft products. The list price for a term license is based on a specific percentage of the perpetual license price. Annual terms licenses are available from 1 to 5 years:

1 year - 20% of list; 2 year - 35% of list, 3 year - 50% of list, 4 year 60% of list and 5 year 70% of list.

The term license percentages are not applied to the list support price. E-Business discount, and any approved discount, is applied to the list support price.

Example :

For a perpetual license for 10 Application Users of PeopleSoft Financials, the list license price is \$45,950 and the list annual support price is \$10,109.

For a one year term license of PeopleSoft Financials, the list license price is 20% of \$45,950 = \$9,190. The list annual support price remains \$10,109, and is not affected by the 20% term multiplier.

If this was part of a larger contract which qualified for a 10% E-Business discount, the one year term net license price would be \$8,271 and the net annual support price would be \$9,098.10.

If your Program License does not specify a term, the Program license is perpetual and shall continue unless terminated as otherwise provided in the Agreement.

5 Year Term: A Program license specifying a 5 Year Term shall commence on the Effective Date of the order and shall continue for a period of 5 years. At the end of the 5 Year Term the Program license shall terminate automatically.

4 Year Term: A Program license specifying a 4 Year Term shall commence on the Effective Date of the order and shall continue for a period of 4 years. At the end of the 4 Year Term the Program license shall terminate automatically.

3 Year Term: A Program license specifying a 3 Year Term shall commence on the Effective Date of the order and shall continue for a period of 3 years. At the end of the 3 Year Term the Program license shall terminate automatically.

2 Year Term: A Program license specifying a 2 Year Term shall commence on the Effective Date of the order and shall continue for a period of 2 years. At the end of the 2 Year Term the Program license shall terminate automatically.

1 Year Term: A Program license specifying a 1 Year Term shall commence on the Effective Date of the order and shall continue for a period of 1 year. At the end of the 1 Year Term the Program license shall terminate automatically.

ORACLE SUPPORT SERVICES

Oracle Support Services (OSS) offers the following programs: Software Update License & Support to provide customers with the right to Oracle product upgrades and 24x7 support of all Oracle products, and Oracle Advanced Customer Support for a menu of additional services designed to provide an enhanced level of support. Services may vary by country. For availability, contact your local Support Sales representative. Incident Server Support Packages

Incident Server Support Packages provide incident-based web support for the following limited product sets:

- Oracle Database Server Support Package (2,300 USA (Dollar) for 10 incidents on one server):
Oracle Database Enterprise Edition, Oracle Database Standard Edition 2, Partitioning, Real Application Clusters, Advanced Compression
- Oracle Application Server Support Package (1,150 USA (Dollar) for 10 incidents on one server):
Internet Application Server Enterprise Edition, Internet Application Server Standard Edition, Internet Application Server Java Edition

With the purchase of Incident Server Support Packages, customers receive access to Oracle *MetaLink*, which provides 24x7 web-based technical support, including web-based Technical Assistance Requests.

Customer Support Services Policies and Definitions

The complete policy can be found in the Technical Support Policies at <http://www.oracle.com/support>

Extended Support

Customers with current Software Updates, License & Support can support their product for a further 3 years, past the initial 5 years from the general availability date of the product, by purchasing Extended Support. Extended Support fees are applied to the desupported Oracle programs only. Extended Support fees consist of the prior year's fee for Software Updates & Support plus the applicable renewal adjustment, plus an additional fee based on the year. Additional fees are as follows:

Year 6 after product release: 10% of current year's Software Update License & Support
Year 7 after product release: 20% of current year's Software Update License & Support
Year 8 after product release: 20% of current year's Software Update License & Support

Extended Support offers the following:

- Updates, fixes and security alerts
- Tax, legal and regulatory updates
- Upgrade scripts
- Technical support
- Major product and technology releases

Sustaining Support

Sustaining Support offered in years 9 and beyond provides technical support—i.e., access to Oracle's online and call-center support—and rights to future products for as long the customer is purchasing support. Sustaining support is charged as per renewal pricing, found in the "Support Renewals" section above.

Sustaining Support provides:

- Technical Support
- Access to MetaLink/Customer Connection
- Major product and technology releases
- Pre-existing fixes

ORACLE ON DEMAND

Oracle offers complete application, database, and hardware management services, which can help lower a customer's IT maintenance costs and increase support resolution time.

Administration Services

Administration Services are system administration, application technology management and monitoring activities provided remotely by Oracle for licensed Oracle programs. Administration Services are contracted on yearly terms; the billing is annual in advance.

Computer and Administration Services

Computer Services must be sold together with Administration Services. Computer and Administration Services are system administration, application technology management, and monitoring activities for licensed Oracle programs that are provided by Oracle from a data center hosting facility to which the customer has remote applications access. Computer and Administration Services are contracted on yearly terms; the billing is annual in advance.

PeopleSoft Global Price List Supplement
May 31, 2016

Included and Prerequisite Products

Certain PeopleSoft and JD Edwards products may need other PeopleSoft or JD Edwards products to be installed as a prerequisite for their operation. The following is a guide to products which are shipped with the license and products which require a separate license purchase. It is the responsibility of the Sales Representative and Contract Administrator to specify products included with a license but requiring separate order. Version numbers are indicated only where there is a specific license dependency.

Not all platforms have product availability in the same release.

Restricted Use licenses may be used only to run and install the licensed Program with which they are included. Specific restrictions for such licenses are described in the licensed Program's Documentation.

Third-Party Products

Oracle products that contain third-party products of some form are indicated as such on the price list and Supplement with an 'X' in the '3rd Party' column on each price list and supplement. These products may have royalty exposure with discounting restrictions or they may have metric restrictions that prevent them from being added to a ULA or unlimited deal, or possibly both. There are two documents that must be accessed for each deal: 1) the Royalty Bearing Product List; 2) the HQApp-ULA list.

Royalty Bearing Product List

First, check the specific royalty exposure on each of these products as provided through the License Royalty Team spreadsheet. Detailed instructions provided below.

Go to: "<http://my.oracle.com/site/fin/gfo/GlobalProcesses/InboundLicenseRoyalties/index.htm>". Then on the resulting page, under General Information, click on Royalty Bearing Product List.

Products found to have royalty exposure restrictions must not be discounted below the royalty cost listed in the spreadsheet. There are two tabs on the Royalty Bearing Products list: Royalty Bearing Products and Reporting Only. Search the Royalty Bearing Products tab first then, if needed, search the Reporting Only tab. Here are some tips for using the Royalty sheet.

The Royalty Bearing Products tab is the main tab and lists all products that have specific royalties assigned to them. If you find the desired product in the Product Description column, look over to the License Royalty column for the royalty restrictions. Also be sure to check any comments. The Support Royalty column is not used for quoting purposes and can be ignored.

If a percentage is listed in the License Royalty column (e.g. 4%), this means the royalty is calculated based on the Net License Fees (NLF) and there is no deal specific minimum price or discount restriction for this product.

If a specific dollar amount is listed in the License Royalty column (e.g. \$20 per unit), then the product may not be discounted below this value under any circumstances. Please make every effort to keep the final price well above this royalty fee.

There are other types of royalty structures so be sure to read carefully. Some of the entries can be a bit confusing so if there is any question as to deal impact or just to get clarification on any royalty, contact Infoprice@oracle.com or Royalty_US@oracle.com prior to quoting the product.

The Reporting Only tab lists those products where royalties are not paid based on individual deals so there is no individual deal impact. Oracle needs only to track sales of the product for reporting purposes and there are no discounting restrictions with these products.

HQApp-ULA List

Second, go to "<http://my.oracle.com/content/native/cnt507565>" to access the HQApp-ULA spreadsheet.

Products appearing on this spreadsheet can **not** be added to a ULA or Unlimited deal. Note that this sheet does not list royalty impact of any kind. Please see the Royalty Bearing Product list for that information. This spreadsheet only lists those products that have metric restrictions and so selling by any other metric is usually not available. Please make sure to highlight any of these products in your ULA approval.

For Oracle partners, please contact your Oracle PRN Representative for additional information on third-party royalty restrictions.

Application Integration Architecture			
Application Integration Architecture Foundation Pack		See Oracle Service Registry restricted-use information below.	WebLogic Suite, SOA Suite for Oracle Middleware, and either Oracle Database Enterprise Edition* or Oracle Database Standard Edition 2 *(Customers should select between the two editions of the Oracle Database based on their business requirements. Customers should consider Oracle Database Enterprise Edition if they wish to leverage advanced features and capabilities of Oracle Database Enterprise Edition.)
Application Integration Architecture Foundation Pack Extension for Communications		See Oracle Service Registry restricted-use information below.	Application Integration Architecture Foundation Pack
Application Integration Architecture Foundation Pack Extension for Insurance		See Oracle Service Registry restricted-use information below.	Application Integration Architecture Foundation Pack
Application Integration Architecture Foundation Pack Extension for Utilities		See Oracle Service Registry restricted-use information below.	Application Integration Architecture Foundation Pack
Note: All Application Integration Architecture (AIA) products listed on next page include restricted-use rights of Oracle Technology and must adhere to the full-use rules noted in the column to the right.		<p>All Application Integration Architecture (AIA) pre-built integrations include restricted-use licenses of supporting Oracle Technology products/components that can be used to configure, modify and extend the integration packs to meet customer's business requirements within the context of the delivered business process and Application(s).</p> <p>However, full-use licenses of the necessary Oracle Technology products would be required if a customer wishes to do either the following:</p> <p>1) Add another application system (a "new spoke") to the AIA pre-built integration (i.e. a new application beyond the original applications the AIA program provided integration for); or 2) Use additional Enterprise Business Objects (EBO) from the Foundation Pack Library.</p> <p>1) In cases where an additional application system is added to the Application Integration Architecture pre-built integration, but no additional Enterprise Business Objects used from the Foundation Pack Library, full-use licenses of the following Oracle Technology products are required:</p> <ul style="list-style-type: none"> i. WebLogic Suite (for use of Internet Application Server Enterprise Edition) ii. SOA Suite for Oracle Middleware iii. Data Integrator Enterprise Edition (when used in the pre-built integration) iv. Oracle Database Enterprise Edition <p>Example: A customer buys the "Order-to-Cash" Process Integration Pack between Siebel CRM and Oracle E-Business Suite and now wants to add another system such as the customer's own "web order portal" to support the same business process. This would be considered another application system and would require full-use licenses of the Oracle Technology products noted directly above. Another application system could also be another application instance, custom built, legacy or a third-party application system.</p> <p>2) In cases where an additional Enterprise Business Object from the Foundation Pack Library is used, full-use licenses of the following Oracle Technology products and AIA product are required:</p> <ul style="list-style-type: none"> i. WebLogic Suite (for used of the Internet Application Server Enterprise Edition) ii. SOA Suite for Oracle Middleware iii. Data Integrator Enterprise Edition (when used in the pre-built integration) iv. Oracle Database Enterprise Edition v. Application Integration Architecture Foundation Pack <p>Example: A customer buys the "Order-to-Cash" Process Integration Pack between Siebel CRM and Oracle E-Business Suite and now wants to extend the integration to include a new business object, such as "Asset" or integration flow, such as "Payment Terms." This would require full-use licenses of the Oracle Technology products noted directly above.</p>	
Note: Oracle Service Registry is an optional component of Application Integration Architecture Foundation Packs and/or Process Integration Packs. You can install and use AIA products without Oracle Service Registry. However, if a customer wants to use Oracle Service Registry to manage only AIA objects and services at runtime, a restricted-use license of Oracle Service Registry is included.		<p>Oracle Service Registry is an optional component for Application Integration Architecture Foundation Packs and/or Process Integration Packs. You can install and use AIA products without Oracle Service Registry. However, if a customer wants to use Oracle Service Registry to manage only AIA objects and services at runtime, a restricted-use license of Oracle Service Registry is included.</p> <p>The restricted-use license of Oracle Service Registry allows customers to view/edit objects and services included with AIA products. If a customer wants to use Oracle Service Registry to manage other content than standard out-of-the-box AIA content, the purchase of a full-use license of Oracle Service Registry is required.</p> <p>Restricted-use license of Oracle Service Registry for AIA is limited to the following:</p> <ol style="list-style-type: none"> 1. Viewing and consuming Oracle AIA content (Oracle intellectual property) available with their licensed AIA Foundation Pack and/or Process Integration Packs. The pre-built AIA content includes: Services/Binding Templates (WSDL), Schemas (XSD) and Transforms (XSLT/XQUERY); 2. Making limited modifications and extensions to the AIA content only in accordance with the AIA extension mechanism, and not for other purposes: <ul style="list-style-type: none"> i. Adding custom attributes to the AIA schemas ii. Adding corresponding transforms for the custom attributes iii. Modifying out-of-the-box AIA services taxonomy/categorization iv. Modifying out-of-the-box AIA endpoint binding templates v. Adding new taxonomies or models to categorize (1) the out-of-the-box and (2) the extended Oracle AIA content <p>Any of the following conditions would trigger the full-use license of Oracle Service Registry with AIA:</p> <ul style="list-style-type: none"> i. Adding custom business services ii. Adding new operation to an existing service iii. Registering your own in-house services iv. Adding new taxonomies or models to categorize customer specific content (from 1, 2, 3 above) v. Modifying attributes and other metadata in Oracle Service Registry other than through the AIA extension mechanism

Product Migration Listings

When moving supported licenses from one operating system to another, the only cost associated with moving supported licenses from one operating system to another is the cost of the new CD Pack. If a CD Pack isn't available for a particular operating system, customers can contact Client Relations to see whether the product is available on the desired operating system. Shipping and media charges may apply.

The product mappings listed below for the PeopleSoft products are for reference only. For PeopleSoft migration information, please use the Global Migrations Database which can be found eSource - Migrations tab.

If you are an Oracle partner, migration listings can be found in the Product Migration Listing documents published on OPN (at <http://www.oracle.com/partners> > Sales > Pricing & Licensing > Migrations)
