

Successful response to security and cyber events, natural disasters and industrial accidents depends on how quickly, accurately and efficiently you share information. **BlueLine Grid** was developed to speed critical communication between public and private sector stakeholders over a secure, trusted network for real-time, collaborative response.

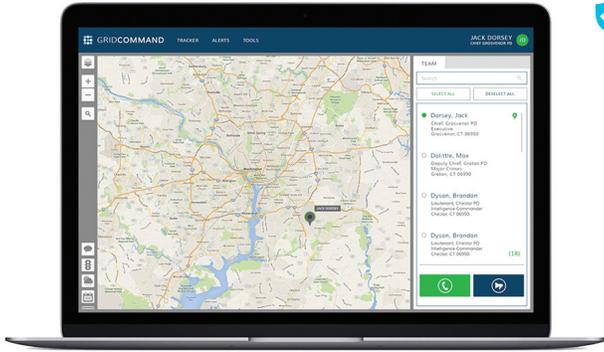

Made for your mobile workforce. BlueLine Grid is a SaaS solution for desktop and mobile devices that enables faster, more effective decision making and coordination. No matter when or where response is needed, you can confidently track teams, create open or closed channels, mass-notify entire communities and create large-scale conference calls — all with a single click from a web browser or mobile device.

A network with critical connections. Bridge the public-private gap by linking corporate response teams, fusion centers, local law enforcement and public safety, the US Intelligence Community and other critical personnel in one communication network. The BlueLine Grid network helps you reduce redundancies, coordinate response efforts and protect lives and corporate assets.

BlueLine Grid's Mission Critical Security Collaboration Platform Includes:

- Encrypted Mass Notification
- Group Messaging
- File Sharing
- Location Tracking
- One-click Conferencing

✓ Proven secure and reliable.

With robust identity credentialing, access management, and encryption, BlueLine Grid creates safe, controlled communication channels. Every sender's message is encrypted in transit, end-to-end with a different key and at rest.

Fast, compliant information sharing. With BlueLine Grid, there's no need to rely on non-compliant email and commercial messaging applications, homegrown/ad hoc solutions or redundant technologies. BlueLine Grid greatly increases your ability to get the right information to the right people at the right time. Through simple, intuitive navigation, you can share messages, photos, videos, files or links across large, open groups, closed conversations or one-to-one interactions. One click starts your conference call.

Priced for lower total cost of ownership. There is no need to spend on multiple platforms to address different modes of communication – BlueLine Grid offers voice, text, file-sharing, direct communication and mass-notification at the enterprise level in a single package. Pricing is straightforward, based on your user group size and alerting or collaboration requirements.

Learn more about how BlueLine Grid enables dynamic communications for high-performance security response.

"The BlueLine Grid platform enables us to alert our public safety and private sector partners in real time and get their feedback more quickly and effectively. It's a first-of-its-kind approach to critical incident management and regional collaboration."

— President, National Fusion Center Association

"BlueLine Grid solves the interoperability and information-sharing challenges we have faced since 9/11, so our public safety agencies can protect us in today's dynamic threat environment."

— Director, Homeland Security Program at the Aspen Institute

"With the app's push notifications, NEDRIX members across Massachusetts were fully aware of the Fens brushfire at 2:45 p.m., approximately 20 minutes before the news reported that the fires had started. What an incredible tool!"

— Volunteer-Director of Public/Private Relations, NorthEast Disaster Recovery Information X-Change (NEDRIX)
